

## Davric Oil & Gas Services

With our footprint firmly laid in partnership and collaboration to achieve common set goals, DavRic Nigeria Limited, our flagship Company over the years has established itself as a **leading energy distribution entity**, operating in the downstream Oil & Gas sector.

We are a leading energy distribution company with focus on the sourcing and supply of Petroleum Products to our clients' operational locations across the country. We specialize in the distribution of *AGO* product with the same capacity to distribute *PMS*, *LPG* and *DPK* to all geo-political zones of the Nigerian Federation.

In collaboration with major Petroleum Product Companies and licensed importers in Nigeria; our Oil & Gas operations the logistics of delivering products particularly Automated Gas Oil [*AGO*] to Tank Farms in Apapa Lagos, Nigeria. This involves arranging transport logistics, through put arrangements, customs clearance as well as compliance with local and other government regulations.

This partnership and necessary collaboration ensure the efficient management of the import process from sourcing the products internationally to final delivery to our clients. In the effective management of this process, we leverage our resources and expertise, including our international connections and network to streamline operations and maintain a consistent supply of the Automated Gas Oil to meet the demands of our clients.

Our Oil & Gas subsidiary leverages on its **dedicated storage facilities** at the Apapa Tank Farm in Lagos as well as its *AGO* Dump Facility in the New Garage area in Ibadan to ensure consistent supply of *AGO* products to our clients' storage and retail facilities.

By also partnering with retail filling stations and smaller energy distribution players, we are able to expand our energy reach and market penetration, catering to a wide range of customers across different locations.

We offer **product last-mile logistics service**, particularly in the area of *AGO* logistics. We utilize our Distribution Fleet of Tankers and Peddler Trucks to ensure a consistent supply of *AGO* from our strategic storage facilities to various

client locations, including Telecoms Cell Sites, Factories and Operational Site Fuel Dumps.

The Company employs all-round robust logistics mechanisms to ensure timely delivery in meeting clients' specific requirements. Through efficient inventory management and scheduling, we are able to maintain adequate stock level and fulfill client orders promptly
